'Actively managed exposure to a portfolio of long and short positions in Australian and international companies focused on generating positive returns in both rising and falling markets'

Investment objective

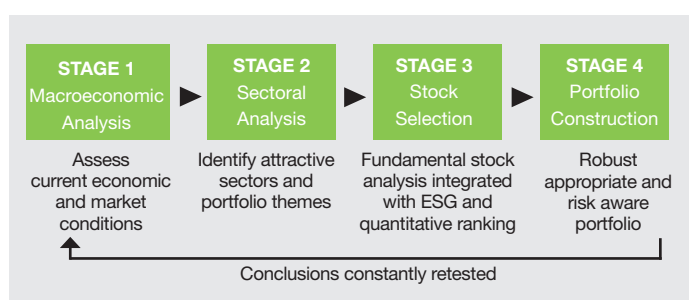

The Fund aims to provide positive investment returns over the long term, benefiting from the volatility within global financial markets by employing a long/short approach to equity markets. There is no guarantee that this objective will be achieved.

Key features of the strategy

- The Fund utilises top down macro analysis, combined with bottom up stock analysis and a disciplined risk management process, with the aim of producing consistent and risk-controlled investment returns.
- The Fund may have a long equity exposure and/or short equity exposure of Australian and international securities, being listed and unlisted securities, including, but not limited to, pre-IPO securities, equity swaps, options and convertible securities. The Fund will hold a maximum of 100 stock positions for its long equity exposure.
- The Fund will typically operate within a net equity exposure band of -25% to +25%. However, the Fund has a minimum net equity exposure of -100% and a maximum of +100%. The Fund's maximum gross exposure is 200%.
- The Fund may use exchange traded and over the counter derivatives for the purpose of gaining long or short exposure in order to implement the Fund's investment strategy. The Fund may be leveraged through the use of derivatives.

Investment style

We classify ourselves as 'core'; wherein at certain stages of the cycle the Fund may have a value or growth tilt. Ausbil employs a four stage process to provide the framework for portfolio construction consistent with its investment philosophy. The process is summarised in the following diagram.
