'The 130/30 Focus Fund<sup>1</sup> amplifies Ausbil's successful stock selection skills by allowing both long and short equity positions'

### Investment objective

The Fund aims to outperform the S&P/ASX 200 Accumulation Index over the long term. There is no guarantee that this objective will be achieved.

### Why Long Short?

The three main benefits of introducing a long short strategy into a diversified portfolio are;

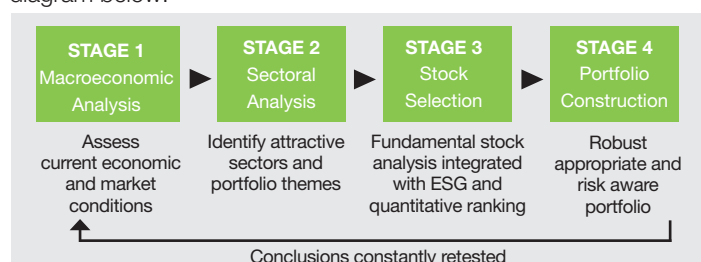

- Potentially delivers superior returns to a long only Australian equities portfolio.
- Provides a moderate to low level of correlation with other asset class returns.
- Takes advantage of expected falls (as well as rises) in stock prices.

### Key features of the strategy

- Fundamental process with quantitative inputs.
- Target allocation of 130% Long, 30% Short.
- Short positions generally comprise either a pairs trade or fundamental shorts.
- Short positions individually managed from an absolute risk management perspective.
- Security lending arrangement that significantly reduces client counter-party risk.

### Investment style

We classify ourselves as 'core'; wherein at certain stages of the cycle the Fund may have a value or growth tilt. Ausbil employs a four stage process to provide the framework for portfolio construction consistent with its investment philosophy. The process is summarised in the diagram below:
