Fact sheet

December 2023

'Ausbil's Active Dividend Income Fund' provides exposure to companies with growing dividend streams, managed by Ausbil's highly skilled equities team'

Investment objective

To achieve a higher level of tax effective income compared to the benchmark and the potential for capital growth over the longer term. There is no guarantee that this objective will be achieved.

Key features of the strategy

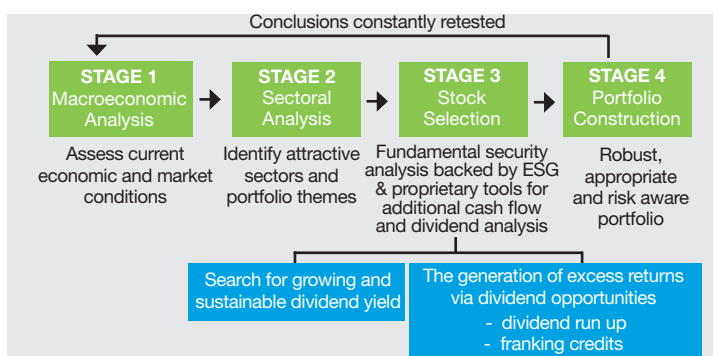

- The Fund provides exposure to an actively managed portfolio, predominantly made up of listed Australian equities with growing, tax effective income.
- Ausbil believes that active management of portfolios facilitates consistent and risk-controlled outperformance. Rather than focusing only on growth or value investing, Ausbil's investment processes allow it to exploit the inefficiencies across the entire market, at all stages of the cycle and across all market conditions.

Key benefits of the strategy

- Exposure to companies with growing dividend streams: access to a portfolio of companies which are expected to have growing dividend streams supported by revenues, earnings and free cash flows.
- Regular distributions: the right to receive dividends generally paid on a monthly basis, subject to the Fund having sufficient income.
- Experienced team: access to Ausbil's highly experienced investment management team with a proven track record.
- Expertise: access to the Australian investment expertise and knowledge of the Ausbil investment management professionals, who combine company level research with top down economic analysis with a disciplined approach to portfolio construction.

Investment style

We classify ourselves as 'core'; wherein at certain stages of the cycle the Fund may have a value or growth tilt. Ausbil employs a four-stage process to provide the framework for the portfolio construction consistent with its investment philosophy. The process is summarised in the diagram below:
