'The Fund provides investors with a diversified portfolio of high quality, dynamic companies outside the top 200'

What are MicroCaps?

Micro-capitalisation ("MicroCap") stocks represent the 'little known' investment opportunities outside the S&P/ASX 200. These businesses tend to have the potential to grow faster than their bigger counterparts.

Why MicroCaps?

The Microcap stock universe is one of the most dynamic. From a portfolio management perspective, it is also among the most inefficient, as the investment universe is under-researched by both institutional investors and the broking community. Through superior proprietary research, we believe these inefficiencies can be exploited to deliver compelling investment opportunities.

Investment objective

To achieve returns (before fees and taxes) in excess of the benchmark over the medium to long term. There is no guarantee that this objective will be achieved.

Key features of the strategy

- Exposure to small and micro capitalised companies.
- Process focuses on companies with sustainable business models and positive earnings revisions.
- Aims to provide investors with long-term capital growth.

Key benefits of the strategy

- Managed by a dedicated and experienced specialist MicroCap team.
- Benefit from Ausbil's existing macroeconomic and sector analysis.

Investment style

Ausbil utilises a 'core' approach and seeks the best opportunities within the MicroCap universe. Our focus is on identifying liquid, well positioned and appropriately structured companies likely to enjoy positive earnings revisions over the coming period. The process is summarised in the diagram below:
