'Ausbil's Active Dividend Income Fund provides exposure to companies with growing dividend streams, managed by Ausbil's highly skilled equities team'

Investment objective

To achieve a higher level of tax effective income compared to the benchmark and the potential for capital growth over the longer term. There is no guarantee that this objective will be achieved.

Key features of the strategy

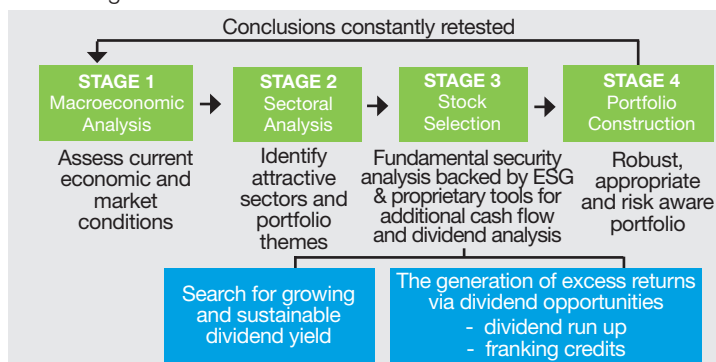

- The Fund provides exposure to an actively managed portfolio, predominantly made up of listed Australian equities with growing, tax effective income.
- Ausbil believes that active management of portfolios facilitates consistent and risk-controlled outperformance. Rather than focusing only on growth or value investing, Ausbil's investment processes allow it to exploit the inefficiencies across the entire market, at all stages of the cycle and across all market conditions.

Key benefits of the strategy

- Exposure to companies with growing dividend streams: access to a portfolio of companies which are expected to have growing dividend streams supported by revenues, earnings and free cash flows.
- Regular distributions: the right to receive dividends generally paid on a monthly basis, subject to the Fund having sufficient income.
- Experienced team: access to Ausbil's highly experienced investment management team with a proven track record.
- Expertise: access to the Australian investment expertise and knowledge of the Ausbil investment management professionals, who combine company level research with top down economic analysis with a disciplined approach to portfolio construction.

Investment style

We classify ourselves as 'core'; wherein at certain stages of the cycle the Fund may have a value or growth tilt. Ausbil employs a four-stage process to provide the framework for the portfolio construction consistent with its investment philosophy. The process is summarised in the diagram below:

Research Ratings

Research House	Rating
Zenith	Recommended
Lonsec	Recommended

1. All data as at 31 March 2026.
2. Calculated as the total distribution for the period expressed as a percentage of the unit price.
3. Calculated Total Return less Distribution Return.
4. Calculated net of fees and before taxes, assumes reinvestment of distributions and excludes franking credits.
5. S&P/ASX 200 Accumulation Index.
6. Excess returns are net of fees but before taxes and exclude franking credits.
7. Calculated net of fees and before taxes, assumes reinvestment of distributions and includes franking credits (which assumes zero tax (tax-exempt) with franking credits being adjusted monthly, in full, and compounded for longer periods).
8. S&P/ASX 200 Franking Credit Adjusted Daily Total Return (Tax-Exempt) Index.
9. Ausbil has the discretion to waive these minimums.
