'The Fund provides a geared exposure to an actively managed portfolio, predominantly made up of listed Australian equities, which are primarily chosen from S&P/ASX 300 Index'

Gearing risk

Gearing is the use of borrowings to invest. It increases and magnifies the volatility of investment gains or losses and reduces the security of capital invested. Geared investments may significantly underperform equivalent non-geared investments when the underlying assets experience negative returns. In extreme negative market conditions, all capital invested could be lost. For other key risks associated with the Fund refer to the Product Disclosure Statement and Additional Information Guide.

Investment objective

To achieve returns (before fees and taxes) in excess of the benchmark over the medium to long term. There is no guarantee that this objective will be achieved.

Key features

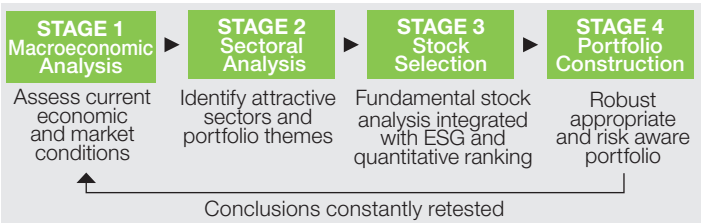

- The Fund provides a geared exposure to an actively managed portfolio, predominantly made up of listed Australian equities.
- Ausbil believes that active management of portfolios facilitates consistent and risk controlled outperformance. Rather than focusing only on growth or value investing, Ausbil's investment processes allow it to exploit the inefficiencies across the entire market, at all stages of the cycle and across all market conditions.

Key benefits

- **Geared exposure to large cap companies**: access to a geared portfolio of large capitalised companies that individual investors may not be able to invest in directly on their own.
- **Diversification:** the potential to diversify an investment portfolio.
- **Experienced team**: access to Ausbil's highly experienced investment management team with a proven track record.

Investment style

Ausbil employs a four-stage process to provide the framework for portfolio construction consistent with its investment philosophy. The process is summarised in the diagram below:
